MECCANO®

MECCANO, GROWING THROUGH BUILDING

Meccano is a name that brings back many memories for all generations. Recognizable at first glance as a timeless brand, this classic construction system has always managed to adapt itself to the great trends.

Kids Play: The Noddy's car.

It is through assembling that children learn how to use their hands. The Kids Play range targets younger children from 2 years old and allows them to build their own toys thanks to a very easy assembly system, specially adapted to smaller hands. Very strong in the target group 2-4, the Noddy license is a great fit for Meccano.

Build & Play: the Infra red racing car and construction storage cases.

For children aged 4+, the plastic Build & Play parts are colorful, flexible, and allow children to build great fun vehicles. The latest new model is a racing car complete with infra red functions! The Build & Play range is produced in France by Meccano's Calais factory. Expanding the Build & Play range, Meccano launches 3 storage cases that look like real tool boxes to build many different models according to 3 skill levels: "easy, mechanical and motorized".

Multimodels : 2 construction vehicles with infra red features.

For children aged 8+, 2 new motorized vehicles with infra red functions will complete Meccano's core range.

Design and Tuning: for enthusiasts of futuristic and stylized models.

Thanks to the technology of flexible metal, the lines of the Design and Tuning models are fluid and aerodynamic. The MP3 connection of the Tuning RC sound system makes this model unique and customizable. The Design parts are produced by Meccano's Calais factory.
